Robert De Weese

What's Inside Your Body? (Science Mini-Unit) Robert De Weese

Here's an effective supplement to any primary science curriculum. Students will use this book to learn how their amazing bodies work, including about such functions as circulation, respiration, digestion, and excretion. Topics include: your divided body cavity, organs and systems, What happens to the food?, What makes the air go in and out?, the heart and blood vessels, keeping the inside of your body clean, healthy and unhealthy habits, and more. Lessons involve identification, matching, solving riddles or puzzles, and coloring.

Also includes six activity cards suitable for science center activities. Activities include: How fast does your heart beat?, Does your heart always beat the same?, What is digestion like?, make a model of the digestive system, How much air can your lungs hold?, and listen to your body. Clear, step-by-step instructions provided.

Simple, accurate line art illustrations throughout. Features two-sided, full-color pull-out poster about Heart and Lungs on one side and Body Systems on the other. All 16 pages perforated for easy removal.
