Learn How to Properly Analyze Categorical Data
Analysis of Categorical Data with R presents a modern account of categorical data analysis using the popular R software. It covers recent techniques of model building and assessment for binary, multicategory, and count response variables and discusses fundamentals, such as odds ratio and probability estimation. The authors give detailed advice and guidelines on which procedures to use and why to use them.

The Use of R as Both a Data Analysis Method and a Learning Tool
Requiring no prior experience with R, the text offers an introduction to the essential features and functions of R. It incorporates numerous examples from medicine, psychology, sports, ecology, and other areas, along with extensive R code and output. The authors use data simulation in R to help readers understand the underlying assumptions of a procedure and then to evaluate the procedure's performance. They also present many graphical demonstrations of the features and properties of various analysis methods.

Web Resource
The data sets and R programs from each example are available at www.chrisbilder.com/categorical. The programs include code used to create every plot and piece of output. Many of these programs contain code to demonstrate additional features or to perform more detailed analyses than what is in the text. Designed to be used in tandem with the book, the website also uniquely provides videos of the authors teaching a course on the subject. These videos include live, in-class recordings, which instructors may find useful in a blended or flipped classroom setting. The videos are also suitable as a substitute for a short course.

From reader reviews:

Ethel Ellis:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the Mall. How about open as well as read a book entitled Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science)? Maybe it is for being best activity for you. You already know beside you can spend your time with your favorite's book, you can better than before. Do you agree with its opinion or you have different opinion?

Mark Clark:

Book is to be different for every single grade. Book for children till adult are different content. As we know that book is very important for us. The book Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) had been making you to know about other information and of course you can take more information. It is very advantages for you. The book Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) is not only giving you a lot more new information but also to become your friend when you sense bored. You can spend your personal spend time to read your publication. Try to make relationship with all the book Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science). You never truly feel lose out for everything should you read some books.

Garth McDonald:

A lot of people always spent their particular free time to vacation or go to the outside with them household or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity honestly, that is look different you can read a book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day every day to reading a e-book. The book Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) it is rather good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. If you did not have enough space to create this book you can buy typically the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not to cover but this book features high quality.

Gerardo Roney:

Within this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become certainly one of it? It is just simple solution to have that. What you must do is just spending your time little but quite enough to have a look at some books. On the list of books in the top listing in your reading list is actually Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science). This book which can be qualified as The Hungry Hillsides can get you closer in

getting precious person. By looking up and review this book you can get many advantages.
