Bio and health informatics meets cloud: BioVLab as an example Various Authors

The exponential increase of genomic data brought by the advent of the next or the third generation sequencing (NGS) technologies and the dramatic drop in sequencing cost have driven biological and medical sciences to data-driven sciences. This revolutionary paradigm shift comes with challenges in terms of data transfer, storage, computation, and analysis of big bio/medical data. Cloud computing is a service model sharing a pool of configurable resources, which is a suitable workbench to address these challenges. From the medical or biological perspective, providing computing power and storage is the most attractive feature of cloud computing in handling the ever increasing biological data. As data increases in size, many research organizations start to experience the lack of computing power, which becomes a major hurdle in achieving research goals. In this paper, we review the features of publically available bio and health cloud systems in terms of graphical user interface, external data integration, security and extensibility of features. We then discuss about issues and limitations of current cloud systems and conclude with suggestion of a biological cloud environment concept, which can be defined as a total workbench environment assembling computational tools and databases for analyzing bio/medical big data in particular application domains.

From reader reviews:

Arturo Hasan:

The book Bio and health informatics meets cloud: BioVLab as an example gives you the sense of being enjoy for your spare time. You can use to make your capable much more increase. Book can to get your best friend when you getting tension or having big problem along with your subject. If you can make studying a book Bio and health informatics meets cloud: BioVLab as an example for being your habit, you can get much more advantages, like add your current capable, increase your knowledge about a few or all subjects. You may know everything if you like open and read a reserve Bio and health informatics meets cloud: BioVLab as an example. Kinds of book are several. It means that, science guide or encyclopedia or some others. So , how do you think about this book?

Rhonda Robitaille:

Now a day people who Living in the era exactly where everything reachable by connect with the internet and the resources in it can be true or not need people to be aware of each information they get. How a lot more to be smart in receiving any information nowadays? Of course the answer then is reading a book. Reading a book can help men and women out of this uncertainty Information specifically this Bio and health informatics meets cloud: BioVLab as an example book as this book offers you rich information and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it everybody knows.

William Riser:

Reading can called head hangout, why? Because if you are reading a book especially book entitled Bio and health informatics meets cloud: BioVLab as an example your mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely will become your mind friends. Imaging each word written in a guide then become one type conclusion and explanation that will maybe you never get ahead of. The Bio and health informatics meets cloud: BioVLab as an example giving you an additional experience more than blown away your head but also giving you useful information for your better life in this era. So now let us explain to you the relaxing pattern here is your body and mind will be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Joyce Jacobs:

This Bio and health informatics meets cloud: BioVLab as an example is great book for you because the content and that is full of information for you who always deal with world and possess to make decision every minute. This specific book reveal it information accurately using great manage word or we can state no rambling sentences in it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tough core information with splendid delivering sentences.

Having Bio and health informatics meets cloud: BioVLab as an example in your hand like keeping the world in your arm, facts in it is not ridiculous one particular. We can say that no guide that offer you world with ten or fifteen tiny right but this reserve already do that. So , this really is good reading book. Hey there Mr. and Mrs. occupied do you still doubt that?
