Applied Scanning Probe Methods IX: Characterization (NanoScience and Technology)

The volumes VIII, IX and X examine the physical and technical foundation for recent progress in applied scanning probe techniques. This is the first book to summarize the state-of-the-art of this technique. The field is progressing so fast that there is a need for a set of volumes every 12 to 18 months to capture latest developments. These volumes constitute a timely and comprehensive overview of SPM applications.
