History of Mathematical Sciences: Portugal and East Asia IV Luis Saraiva

Missionaries, and in particular the Portuguese Assistancy of the Society of Jesus, played a fundamental role in the dissemination of Western scientific knowledge in East Asia. They also brought to Europe a deeper knowledge of Asian countries. This volume brings together a series of essays analyzing important new data on this significant scientific and cultural exchange, including several in-depth discussions of new sources relevant to Jesuit scientific activities at the Chinese Emperor's Court. It includes major contributions examining various case studies that range from the work of some individual missionaries (Karel Slavicek, Guillaume Bonjour) in Beijing during the reigns of Kangxi and Yongzheng to the cultural exchange between a Korean envoy and the Beijing Jesuits during the early 18th century. Focusing in particular on the relationship between science and the arts, this volume also features articles pertaining to the historical contributions made by Tomas Pereira and Jean-Joseph-Marie Amiot, to the exchange of musical knowledge between China and Europe.

Readership: Researchers and academics in history of science; educated readers interested in cultural problems of knowledge transmission, in particular in China, Japan and European countries together with the corresponding audiences in Portuguese and Spanish speaking countries.

From reader reviews:

Megan Snyder:

Have you spare time for the day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to typically the Mall. How about open or read a book titled History of Mathematical Sciences: Portugal and East Asia IV? Maybe it is being best activity for you. You know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have other opinion?

Deborah Ayers:

Information is provisions for folks to get better life, information presently can get by anyone in everywhere. The information can be a knowledge or any news even a problem. What people must be consider when those information which is inside the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take History of Mathematical Sciences: Portugal and East Asia IV as your daily resource information.

Randall Barbee:

The e-book untitled History of Mathematical Sciences: Portugal and East Asia IV is the guide that recommended to you to read. You can see the quality of the guide content that will be shown to a person. The language that creator use to explained their way of doing something is easily to understand. The writer was did a lot of exploration when write the book, to ensure the information that they share to your account is absolutely accurate. You also could possibly get the e-book of History of Mathematical Sciences: Portugal and East Asia IV from the publisher to make you far more enjoy free time.

John Martin:

People live in this new time of lifestyle always aim to and must have the time or they will get wide range of stress from both lifestyle and work. So , when we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we ask again, what kind of activity do you have when the spare time coming to you of course your answer will unlimited right. Then do you ever try this one, reading books. It can be your alternative within spending your spare time, the actual book you have read is definitely History of Mathematical Sciences: Portugal and East Asia IV.
