Shape Detection in Computer Vision Using the Hough Transform V.F. Leavers

Shape detection techniques are an important aspect of computer vision and are used to transform raw image data into the symbolic representations needed for object recognition and location. However, the availability and application of research data relating to shape detection has traditionally been limited by a lack of computational and mathematical skill on the part of the intended end-user. As a result progress in areas such as the automation of visual inspection techniques, where shape detection could play a pivotal role, has been relatively slow. In this volume, Violet Leavers, an established author and researcher in the field, examines the Hough Transform, a technique which is particularly relevant to industrial applications. By making computational recipes and advice available to the non-specialist, the book aims to popularize the technique, and to provide a bridge between low level computer vision tasks and specialist applications. In addition, **Shape Detection in Computer Vision Using the Hough Transform** assesses practical and theoretical issues which were previously only available in scientific literature in a way which is easily accessible to the non-specialist user. **Shape Detection in Computer Vision Using the Hough Transform** fills an obvious gap in the existing market. It is an important textbook which will provide postgraduate students with a thorough grounding in the field, and will also be of interest to junior research staff and program designers.

From reader reviews:

Gabriel Cleveland:

Book is to be different for each grade. Book for children until finally adult are different content. We all know that that book is very important normally. The book Shape Detection in Computer Vision Using the Hough Transform was making you to know about other information and of course you can take more information. It is very advantages for you. The book Shape Detection in Computer Vision Using the Hough Transform is not only giving you much more new information but also for being your friend when you truly feel bored. You can spend your own personal spend time to read your book. Try to make relationship together with the book Shape Detection in Computer Vision Using the Hough Transform. You never really feel lose out for everything in the event you read some books.

Nathan Kelly:

In this 21st one hundred year, people become competitive in each and every way. By being competitive today, people have do something to make these survives, being in the middle of typically the crowded place and notice by surrounding. One thing that often many people have underestimated that for a while is reading. That's why, by reading a book your ability to survive improve then having chance to endure than other is high. For you personally who want to start reading a book, we give you this Shape Detection in Computer Vision Using the Hough Transform book as basic and daily reading book. Why, because this book is greater than just a book.

Paul Gay:

The publication untitled Shape Detection in Computer Vision Using the Hough Transform is the guide that recommended to you you just read. You can see the quality of the book content that will be shown to you. The language that creator use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, to ensure the information that they share to your account is absolutely accurate. You also could possibly get the e-book of Shape Detection in Computer Vision Using the Hough Transform from the publisher to make you a lot more enjoy free time.

Diego Mears:

What is your hobby? Have you heard this question when you got pupils? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person similar to reading or as reading become their hobby. You must know that reading is very important along with book as to be the issue. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You will find good news or update about something by book. Many kinds of books that can you decide to try be your object. One of them is Shape Detection in Computer Vision Using the Hough Transform.
