Seven Web Frameworks in Seven Weeks: Adventures in Better Web Apps (Pragmatic Programmers)

Jack Moffitt, Frederic Daoud

Whether you need a new tool or just inspiration, *Seven Web Frameworks in Seven Weeks* explores modern options, giving you a taste of each with ideas that will help you create better apps. You'll see frameworks that leverage modern programming languages, employ unique architectures, live client-side instead of server-side, or embrace type systems. You'll see everything from familiar Ruby and JavaScript to the more exotic Erlang, Haskell, and Clojure.

The rapid evolution of web apps demands innovative solutions: this survey of frameworks and their unique perspectives will inspire you and get you thinking in new ways to meet the challenges you face daily.

This book covers seven web frameworks that are influencing modern web applications and changing web development: **Sinatra, CanJS, AngularJS, Ring, Webmachine, Yesod, Immutant**. Each of these web frameworks brings unique and powerful ideas to bear on building apps.

Embrace the simplicity of Sinatra, which sheds the trappings of large frameworks and gets back to basics with Ruby. Live in the client with CanJS, and create apps with JavaScript in the browser. Be declarative with AngularJS; say what you want, not how to do it, with a mixture of declarative HTML and JavaScript. Turn the web into data with Ring, and use Clojure to make data your puppet. Become a master of advanced HTTP with Webmachine, and focus the power of Erlang. Prove web theorems with Yesod; see how Haskell's advanced type system isn't just for academics. Develop in luxury with Immutant, an enlightened take on the enterprise framework.

Seven Web Frameworks will influence your work, no matter which framework you currently use.

Welcome to a wider web.

What You Need:

You'll need Windows, MacOS X or Linux, along with your favorite web browser. Each chapter will cover what you need to download and which language versions are required.

From reader reviews:

Barbara Akins:

Now a day people that Living in the era just where everything reachable by match the internet and the resources inside can be true or not demand people to be aware of each info they get. How individuals to be smart in receiving any information nowadays? Of course the answer then is reading a book. Reading through a book can help men and women out of this uncertainty Information specifically this Seven Web Frameworks in Seven Weeks: Adventures in Better Web Apps (Pragmatic Programmers) book since this book offers you rich details and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it everbody knows.

Danna Bullock:

Spent a free time for you to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your free time/ holiday? May be reading a book might be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to attempt look for book, may be the publication untitled Seven Web Frameworks in Seven Weeks: Adventures in Better Web Apps (Pragmatic Programmers) can be great book to read. May be it is usually best activity to you.

Carl Johnson:

Many people spending their time period by playing outside using friends, fun activity having family or just watching TV the whole day. You can have new activity to pay your whole day by studying a book. Ugh, ya think reading a book can really hard because you have to take the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Mobile phone. Like Seven Web Frameworks in Seven Weeks: Adventures in Better Web Apps (Pragmatic Programmers) which is getting the e-book version. So , try out this book? Let's notice.

Norma Baumgarten:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just little students that has reading's spirit or real their passion. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Seven Web Frameworks in Seven Weeks: Adventures in Better Web Apps (Pragmatic Programmers) can make you really feel more interested to read.
