A First Course in Structural Equation Modeling

Tenko Raykov, George A. Marcoulides

A First Course in Structural Equation Modeling Tenko Raykov, George A. Marcoulides

In this book, authors Tenko Raykov and George A. Marcoulides introduce students to the basics of structural equation modeling (SEM) through a conceptual, nonmathematical approach. For ease of understanding, the few mathematical formulas presented are used in a conceptual or illustrative nature, rather than a computational one.

Featuring examples from EQS, LISREL, and Mplus, A First Course in Structural Equation Modeling is an excellent beginner's guide to learning how to set up input files to fit the most commonly used types of structural equation models with these programs. The basic ideas and methods for conducting SEM are independent of any particular software.

Highlights of the Second Edition include:

- Review of latent change (growth) analysis models at an introductory level
- Coverage of the popular Mplus program
- Updated examples of LISREL and EQS
- A CD that contains all of the text's LISREL, EQS, and Mplus examples.

A First Course in Structural Equation Modeling is intended as an introductory book for students and researchers in psychology, education, business, medicine, and other applied social, behavioral, and health sciences with limited or no previous exposure to SEM. A prerequisite of basic statistics through regression analysis is recommended. The book frequently draws parallels between SEM and regression, making this prior knowledge helpful.

From reader reviews:

Robert Pinkerton:

Have you spare time for a day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the actual Mall. How about open as well as read a book called A First Course in Structural Equation Modeling? Maybe it is to be best activity for you. You realize beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have different opinion?

Loren Parker:

This A First Course in Structural Equation Modeling are generally reliable for you who want to be considered a successful person, why. The reason of this A First Course in Structural Equation Modeling can be among the great books you must have is giving you more than just simple reading food but feed you actually with information that perhaps will shock your before knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed people. Beside that this A First Course in Structural Equation Modeling giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that could it useful in your day task. So , let's have it and revel in reading.

Eunice Randle:

The publication untitled A First Course in Structural Equation Modeling is the reserve that recommended to you to read. You can see the quality of the book content that will be shown to anyone. The language that author use to explained their ideas are easily to understand. The copy writer was did a lot of investigation when write the book, so the information that they share to your account is absolutely accurate. You also can get the e-book of A First Course in Structural Equation Modeling from the publisher to make you a lot more enjoy free time.

Maranda Shoemaker:

People live in this new time of lifestyle always make an effort to and must have the time or they will get great deal of stress from both way of life and work. So , when we ask do people have extra time, we will say absolutely of course. People is human not really a huge robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative inside spending your spare time, often the book you have read is definitely A First Course in Structural Equation Modeling.
