Lobsters: Biology, Management, Aquaculture & Fisheries Bruce Phillips

This expanded and fully updated Second Edition of the most comprehensive and successful book on lobsters, comprises contributions from many of the world's experts, each providing core information for all those working in lobster biology, fisheries research and management and lobster aquaculture.

Under the editorship of Bruce Phillips, the Second Edition of *Lobsters: Biology, Management, Fisheries and Aquaculture* delivers exhaustive coverage of these fascinating creatures, stretching from growth and development to management and conservation. A number of chapters from the First Edition covering Growth, Reproduction, Diseases, Behaviour, Nutrition, Larval and Post-Larval Ecology and Juvenile and Adult Ecology have been replaced by new chapters including Lobsters in Ecosystems, Genetics, Translocation, Climate Change, Ecolabelling of Lobsters, Casitas and Other Artificial Shelters, Systems to maximise Economic Benefits.. These new chapters reflect changes that are occurring in lobster management and new research developments brought on by social, climatic and economic changes.

As well as information from new research output, information in each chapter is also included on individual commercial Genera, including aspects of Species and distribution, Predators and diseases, Ecology and behaviour, Aquaculture and enhancement, Harvest of wild populations and their regulations, Management and conservation. The chapter on slipper lobsters has also been expanded to include *Thenus* and *Ibacus* species which are now subject to commercial fisheries. The changes that have occurred in some lobster fisheries, the new management arrangements in place, the status of stocks and the current economic and social situation of each fishery have also been covered and discussed in great detail.

Fisheries scientists, fisheries managers aquaculture personnel, aquatic and invertebrate biologists, physiologists, ecologists, marine biologists and environmental biologists will all find *Lobsters* Second Edition to be a vital source of reference. Libraries in all universities and research establishments where biological and life sciences and fisheries and aquaculture are studied and taught will find it an extremely valuable addition to their shelves.

From reader reviews:

Beverly Brown:

The book Lobsters: Biology, Management, Aquaculture & Fisheries can give more knowledge and information about everything you want. Exactly why must we leave the great thing like a book Lobsters: Biology, Management, Aquaculture & Fisheries? Some of you have a different opinion about guide. But one aim which book can give many facts for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; you can share all of these. Book Lobsters: Biology, Management, Aquaculture & Fisheries has simple shape but you know: it has great and big function for you. You can look the enormous world by open and read a e-book. So it is very wonderful.

Lisa Chaffee:

This Lobsters: Biology, Management, Aquaculture & Fisheries is new way for you who has intense curiosity to look for some information since it relief your hunger of information. Getting deeper you upon it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this Lobsters: Biology, Management, Aquaculture & Fisheries can be the light food in your case because the information inside that book is easy to get simply by anyone. These books develop itself in the form that is certainly reachable by anyone, yep I mean in the e-book web form. People who think that in book form make them feel sleepy even dizzy this guide is the answer. So there is absolutely no in reading a e-book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the item! Just read this e-book style for your better life as well as knowledge.

Aracely Schneider:

That guide can make you to feel relax. This kind of book Lobsters: Biology, Management, Aquaculture & Fisheries was colourful and of course has pictures on the website. As we know that book Lobsters: Biology, Management, Aquaculture & Fisheries has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading which.

Charles Howell:

As a scholar exactly feel bored to be able to reading. If their teacher inquired them to go to the library as well as to make summary for some e-book, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the professor want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that studying is not important, boring and also can't see colorful photos on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach

Chinese's country. So , this Lobsters: Biology, Management, Aquaculture & Fisheries can make you feel more interested to read.
