Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches

Ilya I. Kudish

Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches Ilya I. Kudish

Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches describes a coherent asymptotic approach to the analysis of lubrication problems for heavily loaded line and point contacts. This approach leads to unified asymptotic equations for line and point contacts as well as stable numerical algorithms for the solution of these elastohydrodynamic lubrication (EHL) problems.

A Unique Approach to Analyzing Lubrication Problems for Heavily Loaded Line and Point Contacts

The book presents a robust combination of asymptotic and numerical techniques to solve EHL problems for lightly and heavily loaded line and point contacts. It also proposes a reasonably simple and naturally based regularization approach that produces stable solutions in heavily loaded EHL contacts. The book offers a clear understanding of the processes taking place in heavily loaded line and point EHL contacts as well as of the proper solution structure for EHL problems. It outlines concrete ways to determine important design parameters such as lubrication film thickness and frictional stresses and forces. The book establishes a close link between EHL problems for heavily loaded point and line contacts.

Fine Tune Your Methods for Solving Elastohydrodynamic Lubrication Problems

In most cases, the equations in the book are derived from first principles. The author describes each of the asymptotic and numerical methods in detail, making it easier for readers to apply them to various problems. The problem solutions are presented in the form of simple analytical formulas, graphs, and tables. Almost all the chapters include exercises that highlight key points and skills. Suitable for engineering and applied mathematics students, this is also a unique resource for researchers and practitioners who want to fine tune their solution methods and design better numerical methods to tackle elastohydrodynamic lubrication problems.

From reader reviews:

Gloria Eller:

Reading a book being new life style in this calendar year; every people loves to read a book. When you learn a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, in addition to soon. The Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches provide you with new experience in reading a book.

John Malcolm:

Beside that Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches in your phone, it may give you a way to get closer to the new knowledge or information. The information and the knowledge you may got here is fresh in the oven so don't possibly be worry if you feel like an older people live in narrow small town. It is good thing to have Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches because this book offers to you personally readable information. Do you sometimes have book but you rarely get what it's exactly about. Oh come on, that would not happen if you have this within your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Use you still want to miss that? Find this book as well as read it from today!

Kevin Mabry:

In this particular era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple solution to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. One of many books in the top list in your reading list is Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches. This book that is certainly qualified as The Hungry Mountains can get you closer in turning into precious person. By looking upward and review this reserve you can get many advantages.

Laura Enriquez:

That publication can make you to feel relax. This specific book Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches was colorful and of course has pictures around. As we know that book Elastohydrodynamic Lubrication for Line and Point Contacts: Asymptotic and Numerical Approaches has many kinds or genre. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think you are the character on there. So , not at all of book are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book to suit your needs and try

to like reading in which.
