## **Genetic Engineering-Dream or Nightmare?: The Brave New World of Bad Science and Big Business**

Mae-Wan Ho

Is genetic engineering a modern magic wand, responsible for producing fantastic crops to feed the world's hungry and a miracle cure-all for human disease? Or, as this book claims, is it an untried and inadequately researched technology that is out of control with nightmarish results? The author aims to show how genetic determinism is at odds with the reality of scientific findings; gives rise to misguided practices and projects that are unethical and exploitative; and is hazardous to human and animal health and the ecological environment.
