Algorithms for Image Processing and Computer Vision

J. R. Parker

Algorithms for Image Processing and Computer Vision J. R. Parker
A cookbook of algorithms for common image processing applications

Thanks to advances in computer hardware and software, algorithms have been developed that support sophisticated image processing without requiring an extensive background in mathematics. This bestselling book has been fully updated with the newest of these, including 2D vision methods in content-based searches and the use of graphics cards as image processing computational aids. It's an ideal reference for software engineers and developers, advanced programmers, graphics programmers, scientists, and other specialists who require highly specialized image processing.

- Algorithms now exist for a wide variety of sophisticated image processing applications required by software engineers and developers, advanced programmers, graphics programmers, scientists, and related specialists
- This bestselling book has been completely updated to include the latest algorithms, including 2D vision methods in content-based searches, details on modern classifier methods, and graphics cards used as image processing computational aids
- Saves hours of mathematical calculating by using distributed processing and GPU programming, and gives non-mathematicians the shortcuts needed to program relatively sophisticated applications.

Algorithms for Image Processing and Computer Vision, 2nd Edition provides the tools to speed development of image processing applications.

From reader reviews:

Juanita Hernandez:

What do you think about book? It is just for students since they're still students or the item for all people in the world, exactly what the best subject for that? Only you can be answered for that query above. Every person has distinct personality and hobby for each other. Don't to be obligated someone or something that they don't want do that. You must know how great in addition to important the book Algorithms for Image Processing and Computer Vision. All type of book are you able to see on many sources. You can look for the internet resources or other social media.

Susan Padgett:

Reading a book can be one of a lot of pastime that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new data. When you read a reserve you will get new information since book is one of several ways to share the information or even their idea. Second, reading through a book will make you more imaginative. When you examining a book especially fictional book the author will bring that you imagine the story how the character types do it anything. Third, it is possible to share your knowledge to some others. When you read this Algorithms for Image Processing and Computer Vision, you are able to tells your family, friends in addition to soon about yours book. Your knowledge can inspire others, make them reading a reserve.

Dawn Fernandez:

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information that may give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire their reader with their story or their experience. Not only situation that share in the textbooks. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some analysis before they write for their book. One of them is this Algorithms for Image Processing and Computer Vision.

John Rivera:

E-book is one of source of knowledge. We can add our understanding from it. Not only for students and also native or citizen will need book to know the up-date information of year to be able to year. As we know those ebooks have many advantages. Beside we all add our knowledge, also can bring us to around the world. From the book Algorithms for Image Processing and Computer Vision we can acquire more advantage. Don't that you be creative people? Being creative person must like to read a book. Simply choose the best book that suitable with your aim. Don't become doubt to change your life with that book Algorithms for Image Processing and Computer Vision. You can more inviting than now.
