Foundations for Programming Languages (Foundations of Computing)

John C. Mitchell

Foundations for Programming Languages (Foundations of Computing) John C. Mitchell

Written for advanced undergraduate and beginning graduate students, Foundations for Programming Languages uses a series of typed lambda calculi to study the axiomatic, operational, and denotational semantics of sequential programming languages. Later chapters are devoted to progressively more sophisticated type systems. Compared to other texts on the subject, Foundations for Programming Languages is distinguished primarily by its inclusion of material on universal algebra and algebraic data types, imperative languages and Floyd-Hoare logic, and advanced chapters on polymorphism and modules, subtyping and object-oriented concepts, and type inference. The book is mathematically oriented but includes discussion, motivation, and examples that make the material accessible to students specializing in software systems, theoretical computer science, or mathematical logic. Foundations for Programming Languages is suitable as a reference for professionals concerned with programming languages, software validation or verification, and programming, including those working with software modules or object-oriented programming. Foundations of Computing series

From reader reviews:

Arthur Lee:

The book Foundations for Programming Languages (Foundations of Computing) can give more knowledge and information about everything you want. So why must we leave the great thing like a book Foundations for Programming Languages (Foundations of Computing)? A few of you have a different opinion about book. But one aim that book can give many info for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or data that you take for that, you could give for each other; you could share all of these. Book Foundations for Programming Languages (Foundations of Computing) has simple shape however, you know: it has great and big function for you. You can appear the enormous world by open and read a publication. So it is very wonderful.

Susan Preuss:

The publication untitled Foundations for Programming Languages (Foundations of Computing) is the publication that recommended to you to learn. You can see the quality of the guide content that will be shown to you. The language that author use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, and so the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Foundations for Programming Languages (Foundations of Computing) from the publisher to make you more enjoy free time.

Susan Ross:

This Foundations for Programming Languages (Foundations of Computing) is great e-book for you because the content that is certainly full of information for you who always deal with world and possess to make decision every minute. This particular book reveal it info accurately using great manage word or we can say no rambling sentences inside. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but hard core information with attractive delivering sentences. Having Foundations for Programming Languages (Foundations of Computing) in your hand like getting the world in your arm, details in it is not ridiculous just one. We can say that no guide that offer you world throughout ten or fifteen minute right but this publication already do that. So , this is good reading book. Hi Mr. and Mrs. occupied do you still doubt which?

Loretta Jones:

Don't be worry should you be afraid that this book will filled the space in your house, you can have it in e-book way, more simple and reachable. This particular Foundations for Programming Languages (Foundations of Computing) can give you a lot of friends because by you taking a look at this one book you have factor that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This reserve offer you information that maybe your friend doesn't realize, by knowing more than additional make you to be great folks. So , why hesitate? We need to have Foundations

for Programming Languages (Foundations of Computing).
